

CFE Capital announces the payment of the quarterly distribution, corresponding to CFE FIBRA E, corresponding to 1Q2023. This distribution will be \$0.5750 MXN pesos per Trust Stock Certificate for Series A (FCFE18) and \$0.0001 MXN for Series B (FCFE18-2)

Mexico City, Mexico, March 22nd, 2023.- CFE Capital, S. de R.L. de C.V., in its capacity as administrator of CFE FIBRA E, the first energy and infrastructure investment trust specialized in the energy sector in Mexico, informs its investing public of the following:

The distribution of the First Quarter of 2023 includes the months of December 2022, January and February 2023, the period where the lowest demand for electricity of the year is recorded given the seasonality of the sector.

This distribution includes the collection rights corresponding to 12 weeks and the respective reimbursements of 13 weeks of operation, therefore it considers a total distribution of \$0.5750 MXN/CBFE¹ for Series A (FCFE18) and \$0.0001 MXN/CBFE for Series B (FCFE18- 2), which will be distributed on March 31st, 2023.

The distribution of the first quarter of 2023 will be carried out in accordance with the distribution policy considering the following:

1. Minimum Quarterly Distribution for Series “A” (\$0.5750 pesos per CBFE).
2. Minimum Quarterly Distribution for Series “B” (\$0.0001 pesos per CBFE).

The total amount to be distributed among the holders amounts to \$490,617,893 MXN², resulting in a distribution of \$0.5750 MXN for each CBFE for Series A (FCFE18) and \$0.0001 MXN for each CBFE for Series B (FCFE18-2). For both series, the amount corresponds to capital reimbursement. The purpose of this composition is to ensure compliance with the CFE FIBRA E regime, maintaining its tax benefits.³

This distribution considers the following factors:

- A **2.8%** growth in electric power volumes compared to the same period of the previous year.
- A **3.4%** growth in the average collection rights during the period, even considering that this quarter has one week less of collection rights, compared to 1Q22.
- An execution of **71%** of the 2022 budget, considering that in the last quarter of the year and due to the nature of the transmission expenses, an important part of the approved budget is exercised, mainly in the items of major and minor maintenance, as well as in the intercompany item that also includes maintenance of the 115kV to 69 kV facilities of the National Transmission Network, which are direct investments for maintenance and operation, in order to meet international standards in their performance indicators.

¹ Trust Stock Certificates.

² In total there are 853,195,411 Series “A” certificates in circulation and 284,398,471 Series “B” certificates.

³ Section VI Fiscal Regime of the Placement Prospectus.
