CFECAPITAL ANNOUNCES THE PAYMENT OF THE QUARTERLY DISTRIBUTION OF CFE FIBRA E, CORRESPONDING TO THE THIRD QUARTER OF 2025

- Transmission business model consolidates as the foundation of stable and sustainable income.

CFECapital, in its capacity as Administrator of CFE FIBRA E—the only financial vehicle with access to the transmission sector in Mexico—informs the investing public that the distribution corresponding to the third quarter of 2025 amounts to MXN \$1,118.9 million. This figure represents the second-highest distribution in the history of CFE FIBRA E and will be paid to certificate holders on September 30, 2025, in strict compliance with the current Distribution Policy.

Series A holders will receive the Minimum Quarterly Distribution (MQD) corresponding to the period, while Series B holders will receive the MQD for this period, along with the pending portion of the MQD from the first quarter of the year. In addition, MXN \$335.5 million will be distributed on a pro-rata basis between both series, because of the excess cash flows generated this quarter.

This performance is mainly driven by the increase in transmitted energy volumes and the continued strengthening of the National Transmission Network, supported by investments aimed at enhancing its capacity and reliability. These factors consolidate the transmission business model as the basis of stable and sustainable long-term revenues.

CFECapital reiterates its commitment to professional, responsible, and transparent management aligned with best practices, and will continue evaluating strategic opportunities that create value for the Holders and investors of CFE FIBRA E.
