CFECAPITAL ANNOUNCES PAYMENT OF THE QUARTERLY DISTRIBUTION OF CFE FIBRA E FOR THE THIRD QUARTER OF 2025.

- The transmission business model is consolidated as a basis for stable and sustainable income.

CFE Capital, in its capacity as Administrator of CFE FIBRA E, the only financial vehicle with access to the transmission sector in Mexico, informs the investing public that the distribution for the third quarter of 2025 amounts to \$1,118.9 million pesos, which represents the second highest distribution in the history of CFE FIBRA E, and will be paid to certificate holders on September 30, 2025, in strict accordance with the current Distribution Policy.

Series A holders will receive the Minimum Quarterly Distribution (MQD) for the period, while Series B holders will receive the MQD for this period, together with the outstanding portion of the MQD for the first quarter of the year. In addition, \$335.5 million pesos will be distributed pro-rata between both series because of the surplus flows generated this quarter.

This performance is mainly due to the increase in transmitted energy volumes and the continued strengthening of the National Transmission Network, driven by investments aimed at improving its capacity and reliability. These factors consolidate the transmission business model as a basis for stable and sustainable revenues in the long term.

CFE Capital reiterates its commitment to professional, responsible, and transparent management in line with best market practices, and will continue to evaluate strategic opportunities that generate value for CFE FIBRA E holders and investors.
